1. [redacted] wanted to know if the VA-11 Amplifier (2-32 Mc) would be acceptable with a 9 db. noise figure. He was informed that the original spec. of 6 DB is mandatory. He will change the transistor in these units to obtain the desired figure and will deliver on schedule. 2. [redacted] discussed the solar powered amplifier and wanted to know the desired gain of the unit. He knows the parameters of the system with which this unit will operate and was asked to make a usable device based on these parameters. 3. An engineering type document will be delivered as an instruction manual for the solar powered amplifier.
